

# Sabine

Rapidly introduce product components to address system gaps

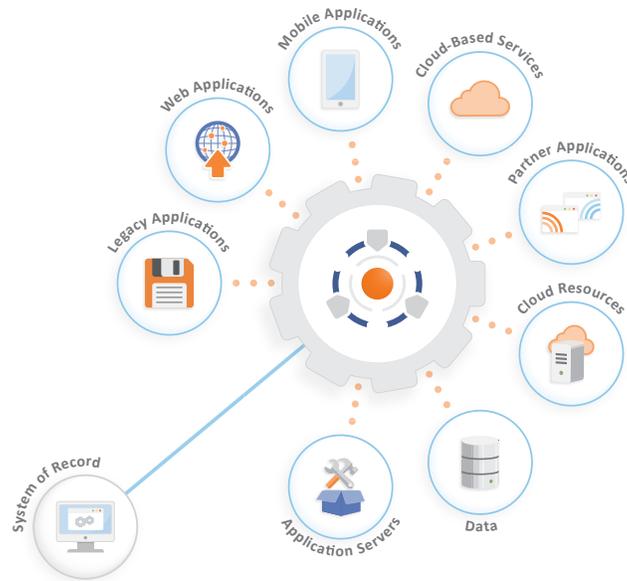

For organizations seeking ability to connect, modernize or leverage systems that lack bespoke components

## Product Overview

Customer-specific MVP Code that performs high-performance, reliable tasks such as APIs, composite APIs, unified APIs, and many other interfaces, scripts, queries, transformations, webservice, or similar customer product solution components.

## Business Level Benefits

- Rapid implementation
- Follows design standards
- Tailored to customer use case
- Adds sustainability
- Complete application test support
- Deployed in gateway, ESB, or autonomous model

## Features

### Productized Format

Confidently rely on service levels and product support through the complete lifecycle of utilization

### Bespoke Functionality

Customers can focus on existing systems with the expectation that Sabine will fill the identified gap

### Full Lifecycle Support

Changes to applications, formats, frequencies, and security protocols will be updated to stay current with customer standards

## FARO Differentiators for Government

You can count on FARO's Solutions to support customer confidence in IT execution:

- Pre-Engineered Solutions – We removed the “some assembly required” issues with low risk, proven solutions, that reduce delays in implementation
- Customer Site or Cloud Friendly – FARO works with any FedRAMP Moderate Public Cloud
- Team Support – We are integrated, with named resources that align as an extension of your existing team
- Deployment Support – Fully managed or shared responsibility
- Compliance Support – Unlike other vendors, FARO is at your side with NIST, FIPS, HIPAA, and State-specific compliance and audit tasks
- 24x7 Support – Our team is providing “around the clock” support including night and weekend deployments with your teams or on behalf of your teams
- Engineering Support – Connecting and supporting defined solutions in a complicated ecosystem of your environment

## Compatibility Model

Sabine can be integrated with numerous popular products including:

- Language Compatibility: .Net (various version), Java, node.JS (various version), Python, Ruby, Perl, PHP, KQL, GraphQL, C, C++, C#
- System Compatibility: Unix, Windows, Linux, Kubernetes
